

EXPERIMENT 1

1. Create a simple cloud software application and provide it as a service using any Cloud Service Provider to demonstrate Software as a Service (SaaS).

AIM:

To create a simple **Library Management System** using **Zoho Creator** and demonstrate the **Software as a Service (SaaS)** model by hosting the application on the cloud.

PROCEDURE:

- Sign in to Zoho Creator.
- Create a new application named Library Management System.
- Create the Member Registration Form and add the required fields.
- Create the Book Management Form and add book details.
- Create the Book Issue/Return Form and link it with the Member Registration and Book Management forms using Lookup fields.
- Save the forms and test the application by entering sample data.
- Publish the application and access it through a web browser to demonstrate SaaS.

SNAPCHAT:

The top screenshot displays the 'Book Management Form' in a web application. The sidebar on the left contains navigation links: 'Library Management System', 'Book Management Form', 'Book Management Form Report', 'Member Registration Form', and 'Book Issue/Return Form'. The main content area is titled 'Book Management Form' and contains the following fields:

- Book ID: 22 (with a placeholder 'Enter Book ID')
- Book Name: Cloud Computing (with a placeholder 'Enter Book Name')
- Author Name: Rajkumar Buyya (with a placeholder 'Enter Author Name')
- Category: Choice 1 (dropdown menu)
- Publisher: Morgan Kaufmann (with a placeholder 'Enter Publisher Name')
- Availability: Choice 1 (dropdown menu)

A 'Submit' button is located at the bottom of the form.

The bottom screenshot displays the 'Book Management Form Report' page. It features a search bar, a '+ Add Book' button, and a table with the following data:

	Book ID	Book Name	Author Name	Publisher	Category	Availability
☐	22	Cloud Computing	Rajkumar Buyya	Morgan Kaufmann	Choice 1	Choice 1

At the bottom of the report, it states 'Showing 1 to 1 of 1 entries' and includes a pagination control showing '1'.

RESULT:

A cloud-based **Library Management System** was successfully created using **Zoho Creator**. The application was hosted on the cloud and could be accessed through a web browser, demonstrating the **Software as a Service (SaaS)** model.
